

Ektron eWebEditPro+XML – XML/XHTML business user authoring

Ektron eWebEditPro+XML makes it easy (and transparent) for business users to author XML content. Contributors easily add content (e.g., text, graphics) by using the familiar toolbar. The business users never need to see the XML tags.

XHTML formatting can make parts read-only

Options can be loaded from a schema

Customizable toolbar

XML tag displays are fully customizable

- Full support for schema and DTD validation
- XSLT Transformation on document load and save
- XML Object Model: Direct tag editing through tag object and script
- Has all the same features and functionality as eWebEditPro plus more
- Macromedia Dreamweaver extensions available for rapid deployment and easy integration.

Ektron eWebEditPro – HTML/XHTML business user authoring

Ektron eWebEditPro is the leading XHTML/HTML editor—allowing content contributors to easily create and publish Web content, while Webmasters/IT maintain control over a site's look and feel.

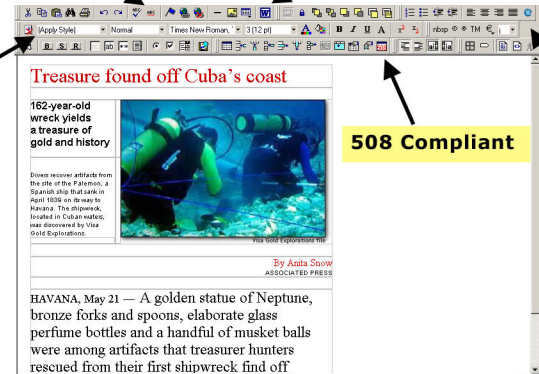

- The best MS Word filtering on the market!
- XHTML compliance: well-formed content
- Developer API using JavaScript objects—properties, methods, and events
- International language support
- Sample code for Macromedia ColdFusion, Microsoft ASP, ASP.NET, JSP, Perl, PHP, and others.
- Macromedia Dreamweaver extensions allow developers to easily add Ektron eWebEditPro to any Web page.

Spell Check Edit Content in MS Word

Advanced style sheet support

508 Compliant

Customizable toolbar

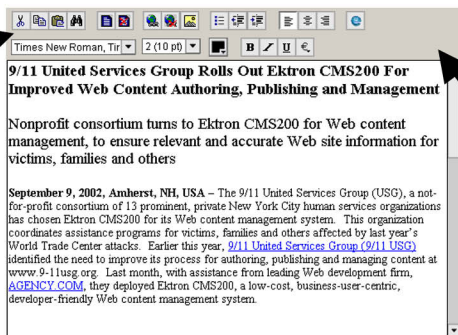

Ektron eWebWP – Web word processing

Ektron eWebWP is a browser-based text formatting editor. Built upon Macromedia Flash MX technology, Ektron eWebWP loads quickly and is available to users on virtually any client platform

Core set of word processing functionality

Built on Flash MX technology

- Offers a core set of word processor formatting features
- Replaces a standard text area field to allow text formatting functionality
- Gives online users the ability to format text within a standard Internet browser
- Ideal for sites needing enhanced formatting capabilities for online users such as auction sites, resume posting, personal ads, discussion forums, Web logs, and Web-based e-mail
